

## Overview

The DC Power Group at Syncworks is here to assist our customers with their DC power needs. We have aligned ourselves with the biggest names in the industry. Our highly experienced project managers and installation staff provide exceptional service. Our attention to detail sets us apart from others. Clear communication with customers, vendors, and installation personnel is paramount to a job well done.

## Power Systems

Manufacturers offer products ranging from small brick chargers to massive systems with many cabinets. We can help you determine what works best for your needs. Our job is to make your project simple and carefree through versatility and product understanding.

## Project Management

Project management is the core of our customer service. From understanding customer requests and deciphering necessary project elements to informing our field personnel of requirements and changes, we are second to none. Our talented and experienced staff ensure a job moves smoothly from start to finish.

## Batteries

Whether you need 12 Vdc shelf-mount batteries, large VRLA battery strings, or flooded battery installations, we can help. We offer the latest advancements in terminal positioning, temperature tolerance, and extended reserve.
