

Overview

Communication networks are vast and diverse, with a wide range of equipment and formats. Their ongoing evolution is driving more efficient use of space, power, and connectivity. Syncworks has assembled a team to help customers establish a strong foundation for growth. Our focus is on the core systems that form the backbone of a functional facility. Whether it's timing, DC power, or grounding, we can help you create a comprehensive facility with future-ready plans.

Engineer, Furnish & Install

Collaborative design from start to finish is the best way to bring a facility in line with the customer's goals. Syncworks offers surveys and audits to gather the necessary information for making informed decisions. We also provide troubleshooting, physical information catalogs, and recommendations, all with the customer's objectives in mind. Syncworks has extensive experience in these environments and works with trusted partners in areas such as AC services, generators, and HVAC.

- Facility & DC Power Design Consultation
- Infrastructure
- DC Power Systems
- Facility Documentation
- Inspections, Audits, Thermal Imaging

Services

- Monitoring, Alarm
- Power Cables, Secondary Cabling, Cabinets, Power Bays
- Battery Install, Removal, Recycle
- Infrastructure
- Cable racking
- Fiberguide
- Ethernet Basket
- Grounding
- RR density
- Hot Aisle Containment
- Power Plant
- DC Distribution
- Batteries
- Inverters
- Rack and Stack
- Fiber Termination
- Coax Combing
- De-commissioning
- Recycle
- Logistics
- Spares Storage and Management

Products

- Batteries
- Rectifiers
- Power Plants
- Synchronization
- Distribution
- Inverters
- Fuse Panels
- Cable
- Ladder Rack
- Relay Rack
- Cabinetry
- Breakers
